

Table 2. Expected and Observed Bats of Case Mountain BLM Unit

D. Johnston, H.T. Harvey & Associates

22 January 2002

<b>ORDER: CHIROPTERA (Bats)</b>			
<b>FAMILY: VESPERTILIONIDAE (Plain-nosed Bats)</b>			
Little Brown Myotis	<i>Myotis lucifugus</i>		Expected
Yuma Myotis	<i>Myotis yumanensis</i>		Lower
Long-eared Myotis	<i>Myotis evotis</i>		Observed
Fringed Myotis	<i>Myotis thysanodes</i>		Observed
Long-legged Myotis	<i>Myotis volans</i>		Observe
California Myotis	<i>Myotis californicus</i>		Observe
Western Small-footed Myotis	<i>Myotis ciliolabrum</i>		Observe
Silver-haired Bat	<i>Lasionycteris noctivagans</i>		Expected
Western Pipistrelle	<i>Pipistrellus hesperus</i>		Lower
Big Brown Bat	<i>Eptesicus fuscus</i>		Observe
Western Red Bat	<i>Lasiurus blossevillei</i>		Expected
Hoary Bat	<i>Lasiurus cinereus</i>		Expected
Spotted Bat	<i>Euderma maculatum</i>	CSSC	Observe
Townsend's Big-eared Bat	<i>Corynorhinus townsendii pallescens</i>	CSSC	Lower
<b>FAMILY: ANTROZOIDAE (Pallid Bats)</b>			
Pallid Bat <i>Antrozous pallidus</i> CSSC Lower			
<b>FAMILY: MOLOSSIDAE (Free-tailed Bat)</b>			
Mexican Free-tailed Bat	<i>Tadarida brasiliensis</i>		Lower
Western Mastiff Bat	<i>Eumops perotis</i>	CSSC	Lower

**Expected:** These species are expected on the site, but were not observed during the survey, possibly because these species occur only in very few numbers or were not present at the time of the survey. Mexican free-tailed bats were observed along the East Fork of the Kaweah River, adjacent to the site.

**Lower:** These species are expected to occur, or have been observed, in the area but usually in areas lower in altitude:

**Observed:** These species were observed on the project site.
